Friends,\

I am writing to urge you to support a boycott of Hewlett-Packard products and services by the City of Cambridge. This company provides and profits from supplying population control technology to Israel for use against the Palestinians and to ICE for use against immigrants, in violation of their human rights.

I support the American Revolution. I want to finish the Civil War. HP helps push people around. I don't like to see people get pushed around.

I grew up here. In l966 I returned from New York City, and have lived and voted here since then. I helped write the Fresh Pond Reservation Master Plan, approved by The City Council in 2001, and have served on The Fresh Pond Master Plan Advisory Board from 2001 to the present.

I do care about this community and what it stands for.

Respectfully Yours,

James H. Barton
